Linda Ranes, Swank Construction, puts plastic in place to prevent condensation during construction of the new 144-person dormitory, Bldg. 640. The dorm, scheduled for completion in January, is an \$8,871,000 project. The dorm will be built using the "one-plus-one" concept, in accordance with current Air Force standards.

The graphic shows a list of all of the construction projects that are on going or that are projected to start.

Jim Rempel, United Materials, rolls up a piece of safety fencing on Locust Street during the installation of new water and sewer lines. The replacement of the lines is projected to be completed in July. The project will cost \$478,000 and involves replacing existing water and sewer lines behind and in front of military family housing units on Locust Street from the turn circle to Dogwood Street.

Doug Knutson, Central Plumbing and Heating, uncoils wire while working on water lines for fire protection outside of Bldg. 640, the latest dormitory construction project.

(Left) Jim Hunter, Wadsworth Plumbing and Heating, uses a jack to raise a heating unit into place in the chapel. Both the chapel and the sports and fitness center are undergoing heating, ventilation and air conditioning system renovations. The chapel renovation is scheduled for completion in December at a cost of \$665,000.
(Right) Michael Mulvihill, Wadsworth Plumbing and Heating, fits the covering on a heating and air conditioning system during the renovation of the visiting officers' quarters, Bldg. 1680. This project will be done in June and include repairs to wiring, plumbing, fire alarms and heating systems.

Brian Barker, Servicemaster, plasters drywall in the clinic as part of the remodeling of the physical therapy section. Upon completion of this section in July, remodeling will begin in the resource management section.
